5. What do you see as the basic purpose of the public schools?

At the core of it, the goal of public education is to provide well rounded, socially responsible humans
who are ready to add value to society.

6. What is the role of the school board in the fulfillment of that purpose?

The school board sets the direction of the district to achieve that goal, aligning to the values of both the
district and the local community.

7. What should be the relationship between the board members and the administration in the handling of school concerns?

The board sets the direction and priorities, but does not handle the day to day operations of the district. They
employ the superintendent but not the other administrators. The handling of school concerns is done by the
superintendent and other administrators in charge. The board can provide guidance and direction, if
requested, but ultimately is only formally in charge of hiring (and firing) the superintendent.

8. What is the single most critical issue facing the District in the immediate future and how would your background and experiences help the District to meet this challenge?

The single most critical issue facing the district is the division between the community and the school board.
Without a united front in our town we will continue to lose progress. Although there are various causes, it is
fundamentally attributed to a lack of community understanding issues along with poor communication by
the district. These are two of my strengths working in my professional career in manufacturing quality.

9. What do you see as the strengths of PRJUSD?

The community we have here in Paso is our greatest asset. We have some amazing people fighting for our
students unconditionally.
