4 April 2017

To Whom It May Concern:

I have had the opportunity to be a member of the Collaborative Curriculum Design team implemented by my district over the last school year. As a member of this team, I have had the opportunity to work with colleagues to develop integrated standards based units that focus on mastery of ELA anchor standards through the content of science and social studies. The time together has allowed me to get to know my colleagues from sites across the district as we develop curriculum that is challenging, engaging, and creative.

I fully support the continuation of this program and will provide access to any necessary data required.

Sincerely,

Jennifer D'Antonio
Santa Rosa Charter School for the Arts
