*June 21, 2017*

#### *Scope of Services: Mindset Works® SchoolKit*

The Mindset Works **SchoolKit** is a comprehensive intervention that includes **Brainology®**, the student program, and the **MindsetMaker™** online professional development program for one school for one academic year.

Brainology, the student curriculum, is targeted toward students in grades 4 -9. Brainology's blended learning curriculum includes online, animated instructional units as well as offline classroom activities designed to reinforce the program's content. Educators access the Brainology Implementation Guides, which are intended to support implementation leaders in cultivating and reinforcing the growth mindset in their students as they work through the program's online units. The Implementation Guides help strengthen implementation fidelity with sample implementation timelines, and provide educators with differentiated lesson options in order to reach students with various learning needs. Educators are also provided with online tools to track student progress and access student data (such as journal reflections).

The Mindset Works **MindsetMaker** is an online professional development program designed to help educators, including teachers and administrators, learn about the growth mindset and how to incorporate it into their everyday practice to support students and colleagues in developing a growth mindset. The **MindsetMaker** professional development course for educators, is an online multimedia resource that provides educators with the foundational knowledge, strategies, and tools to support a growth mindset in their students and classrooms.

Please note that all components of the **SchoolKit** (**Brainology** and **MindsetMaker**) may be accessed by faculty online and administered to students by faculty members.
