

Site and Classroom Safety

All-In-One: Notification System, Intercom, Bells and Clock

Classroom and Campus Safety

- Identified in the Facilities Master Plan and Implementation Plan
- All-In-One Notification System, Intercom, Bells and Clock
 - First project to start addressing this need
 - Coordinate with Infrastructure Project to reduce implementation costs
 - All elementary, middle, high school campuses and District Office would receive device
- Other Classroom and Campus Safety Projects will be part of future projects
 - e.g. security cameras, fencing, sidewalk and paving repairs

All-In-One: Notification System, Intercom, Bells and Clock

Safety:

- Configurable flashers to notify deaf and hard of hearing staff and students
 - 3 individually controlled colored flashers to signify different types of announcements/messages
- Two-Way Intercom
- Scrolling text messaging for announcements and alerts
- Ability to make campus wide announcements from any phone once new system is installed.

All-In-One: Notification System, Intercom, Bells and Clock

Operability:

- Internet Protocol (IP) based solution works over our data network
- Announcement can be made from any phone rather than a single location generally in the front office.
- One system for sites, classrooms, and outdoor areas for ease of management and maintenance
