Mobile Construction Learning Labs

MIDDLE SCHOOL AND HIGH SCHOOL CONSTRUCTION HANDS-ON LEARNING LABS

- Research has revealed that the best way to engage kids' brains is by having them move their hands.
- Promoting a strong foundational education base built on the knowledge that they can create using their hands and minds, increases the possibility in the development of life-long learners to obtain skills to become Construction Professionals.
- This program is the first step in moving towards realizing such a possibility.

MIDDLE SCHOOL AND HIGH SCHOOL CONSTRUCTION HANDS-ON LEARNING LABS

- These learning labs have been customized to give students the opportunity to learn that success in life can be achieved through apprenticeships in the different construction trades.
- Participants learn proper use of tools and tool safety before they begin the labs.
- They engage in hands-on activities that keep their interests piqued and ensure students understand the different pathways to careers in construction.

MIDDLE SCHOOL AND HIGH SCHOOL CONSTRUCTION HANDS-ON LEARNING LABS

- Middle school students make measurements using their math skills, using different tools and materials in competitive activities with their peers, and other planned activities.
- High school students bend conduit using their geometry skills, making measurements, using different tools and materials in competitive activities with their peers, and other planned activities.
