Instructions for Scoring

The questionnaire consists of 3 Parts. Part I requires that contractors provide complete and satisfactory information. Part II requires that contractor provide Yes or No answers. Part III assigns points to each of the possible answers to the questions, for a combined score. Instructions for scoring each part are provided below at the top of each Part. The last page of Part III provides instructions on determining whether the contractor receives a "Prequalified" or "Not Prequalified" rating.

If the rating is "Prequalified", the contractor's qualified limit will be the lesser of the following (stated in U.S. currency): (a) the largest public works contract the contractor has fully performed within the last five years (as defined by the original contract price, plus additive and deductive change orders), plus 10%; or (b) the contractor's current bonding capacity (as determined by the surety with which the contractor currently has the highest bonding limit). (The information necessary to determine the rating should be provided by the contractor in response to Part I.E.)

A. The contract price (as adjusted by change orders) of the largest public works contract firm has fully performed in the last five years:

\$ _____ + 10% = _____.

B. Firm's current maximum bonding capacity: \$ _____. Name of Bonding Company: _____

Contractor: _____
