I, Kory Gilbert, would like to thank you for your review and consideration of my resume for DSA inspection services for any projects needing DSA inspection in the San Mateo-Foster City School District.

My Experience: I have been a DSA Certified Inspector for over 20 years. Projects inspected have varied from small school upgrades to the inspection of multi-story steel frame and masonry full-school construction. The values of these projects range from \$18,000 to over \$65 million. Types of construction inspected include: Concrete tilt-up, masonry, brace/moment frame structural steel, wood frame, and modular construction. I have ensured that work performed on all school projects conformed with applicable and enforceable codes as it relates to the successful completion and DSA closeout. I have also been approved for and successfully closed out multiple projects at the same time.

I have extensive experience working and coordinating with Testing labs and Special Inspectors including the oversight of in-plant and off-site inspections. This oversight ensured that the tests and inspections performed by these labs and special inspectors conformed to the requirements of the project plans and specifications.

I have ensured that work performed on their projects conformed with all applicable and enforceable codes as it relates to the successful completion and closeout of projects. I work closely with the School District and Project Architects to verify that all work is code compliant.

I have worked closely with the Division of the State Architect during construction on their projects to ensure all work and materials installed on their projects conform to all requirements of approved construction plans and specifications. I have worked with and coordinated with local utility companies and fire departments to ensure all applicable and enforceable requirements have been satisfied.

I have been Project Inspector on projects with varied contract structures for contractors. I have experience with multi prime contract structure and am familiar with the requirements and agreements of responsibility. I also have experience with the lease – lease back contract structure and am familiar with the requirements and agreements of responsibility.

I, again, would like to thank you for your review and consideration.

Kory Gilbert
