

## MODESTO CITY SCHOOLS

TO: Dr. Sara Noguchi, Superintendent Regular Meeting  
SUBJECT: Approval of Contract for Special Education Transportation Services March 9, 2020

---

### BACKGROUND

Goal 3.4: Improve customer services for students, families, staff, programs, schools, and community partners.

Goal Four: Ensure the District is fiscally and operationally sound.

Modesto City Schools SELPA provides home-to-school transportation services to students with disabilities as determined by the IEP process. The District has a current five-year contract with Storer Transportation Services expiring on June 30, 2020.

Storer Transportation Services currently transports 714 ambulatory students and 43 non-ambulatory students.

Modesto City Schools SELPA requires that the transportation contractor provide a turn-key operation. In addition to transportation services, the contractor shall supply a pool of pupil bus aides/monitors who are Crisis Prevention Intervention (CPI) Certified or trained in other SELPA approved behavior intervention program.

Modesto City Schools sought Request For Proposals (RFP) on October 18, 2019 to be due December 6, 2019. The District received 3 proposals for transportation services and requested contractor presentations from Storer Transportation Services and First Student. A District committee reviewed proposals and presentations.

The report will update the Board of Trustees on the Request For Proposals to provide transportation services to students with disabilities.
