Target Employee

**Application Statement:**

I feel that there are many great reasons to choose me as the next Student Representative. I have a passion for public service and I know I’m the best person for the job. I’ve had a lifetime of experience in student government along with experience in community outreach, curricula development, and even the ins and outs of school boards and councils. This has allowed me to be able to effectively reach out to the student community and identify their concerns. The experience has also helped me become a more open minded individual allowing me to seek out the best possible outcome by listening to both sides. Beyond that as a person I’m someone who is passionate for the continued betterment of our society and community on all levels and will work hard to ensure that everything and anything I advocate and support does that. I’m someone who is willing I have done my best to be an advocate for students and teachers and I am ready to serve within a body where I can affect change on a larger level within a platform that others listen to without thinking I’m just a kid who won’t amount to much from a school with an unfair reputation. I want to help students, teachers, and staff district-wide and prepare myself for future endeavors that will hopefully one day lead me to being a Santa Rosa City Schools Board Trustee. I am a proud student of Elsie Allen High School with a lot of knowledge, patience, and love for my community to offer and I look forward to represent Elsie Allen High School as the Student Board Trustee.
