

**Students**

**ADMINISTERING MEDICATION AND MONITORING HEALTH CONDITIONS**

The Governing Board believes that regular school attendance is critical to student learning and that students who need to take medication prescribed or ordered for them by their authorized health care providers should be able to participate in the educational program.

(cf. 5113 - Absences and Excuses)

(cf. 5113.1 - Chronic Absence and Truancy)

Any medication prescribed for a student with a disability who is qualified to receive services under the Individuals with Disabilities Education Act or Section 504 of the Rehabilitation Act of 1973 shall be administered in accordance with the student's individualized education program or Section 504 services plan, as applicable. It is the responsibility of member Local Education Agencies (LEAs) of the North Region Special Education Local Plan Area (SELPA) to prohibit school personnel from requiring a student to obtain a prescription for a substance covered by the Controlled Substances Act as a condition of attending school or receiving a special education assessment and/or service.

(cf. 5141.24 - Specialized Health Care Services)

(cf. 6159 - Individualized Education Program)

(cf. 6164.6 - Identification and Education Under Section 504)

For the administration of medication to other students during school or school-related activities, the Superintendent or designee shall develop protocols which shall include options for allowing parents/guardians to administer medication to their child at school, designate other individuals to do so on their behalf, and, with the student's authorized health care provider's approval, request the district's permission for the student to self-administer a medication or self-monitor and/or self-test for a medical condition. Such processes shall be implemented in a manner that preserves campus security, minimizes instructional interruptions, and promotes student safety and privacy.

(cf. 1250 - Visitors/Outsiders)

(cf. 5141 - Health Care and Emergencies)

(cf. 5141.22 - Infectious Diseases)

(cf. 5141.23 - Asthma Management)

(cf. 5141.27 - Food Allergies/Special Dietary Needs)

(cf. 6116 - Classroom Interruptions)

The Superintendent or designee shall make epinephrine auto-injectors available at each school for providing emergency medical aid to any person suffering, or reasonably believed to be suffering, from an anaphylactic reaction. (Education Code 49414)

The Superintendent or designee shall make a naloxone hydrochloride or another opioid antagonist available for emergency medical aid to any person suffering, or reasonably believed to be suffering, from an opioid overdose. (Education Code 49414.3)

**ADMINISTERING MEDICATION AND MONITORING HEALTH CONDITIONS**

(continued)

The parent/guardian of a student who is a qualified patient pursuant to Health and Safety Code 11362.7-11362.85 may administer medicinal cannabis, excluding medicinal cannabis or cannabis products in a smokeable or vapeable form, to the student at a school site. School personnel are not authorized to administer medicinal cannabis to a student. (Education Code 49414.1)

Before administering medicinal cannabis at a school site, the parent/guardian shall provide to the principal or designee a valid written medical recommendation for the student to be given medicinal cannabis, which shall be kept on file at the school. The parent/guardian shall sign in at the school site before administering the medication, and shall not administer the medication in a manner that disrupts the educational environment or exposes other students. After the parent/guardian administers the medication, the parent/guardian shall remove any remaining medicinal cannabis from the school site. (Education Code 49414.1)

**Emergency and Disaster Preparedness Plan**

The Superintendent or designee shall collaborate with city and county emergency responders, including local public health administrators, to design procedures or measures for addressing an emergency such as a public disaster or epidemic.

(cf. 3516 - Emergencies and Disaster Preparedness Plan)

**Administration of Medication by School Personnel**

Any medication prescribed by an authorized health care provider, including, but not limited to, emergency antiseizure medication for a student who suffers epileptic seizures, auto-injectable epinephrine, insulin, or glucagon, may be administered by a school nurse or other designated school personnel only when the Superintendent or designee has received written statements from both the student's parent/guardian and authorized health care provider (Education Code 49414.7; 49423; 5 CCR 600)

When medically unlicensed school personnel are authorized by law to administer any medication to students, including, but not limited to, auto-injectable epinephrine, insulin, or glucagon, the Superintendent or designee shall ensure that school personnel designated to administer any medication receive appropriate training and, as necessary, retraining from qualified medical personnel before any medication is administered. At a minimum, the training shall cover follow-up procedures, and the proper documentation and storage of medication. Such trained, unlicensed designated school personnel shall be supervised by, and provided with immediate communication access to a school nurse, physician or other appropriate individual.

School nurses and other designated school personnel shall administer medications to students in accordance with the law, Board policy, and administrative regulation and shall be afforded appropriate liability protection.

**ADMINISTERING MEDICATION AND MONITORING HEALTH CONDITIONS**

(continued)

(cf. 3530 - Risk Management/Insurance)

(cf. 4119.42/4219.42/4319.42 - Exposure Control Plan for Bloodborne Pathogens)

(cf. 4119.43/4219.43/4319.43 - Universal Precautions)

The Superintendent or designee shall maintain documentation of the training and ongoing supervision, as well as annual written verification of competency of other designated school personnel.
