The Problem We Are Solving

Today, all the information an education leader needs to be successful lives in silos. They lack:
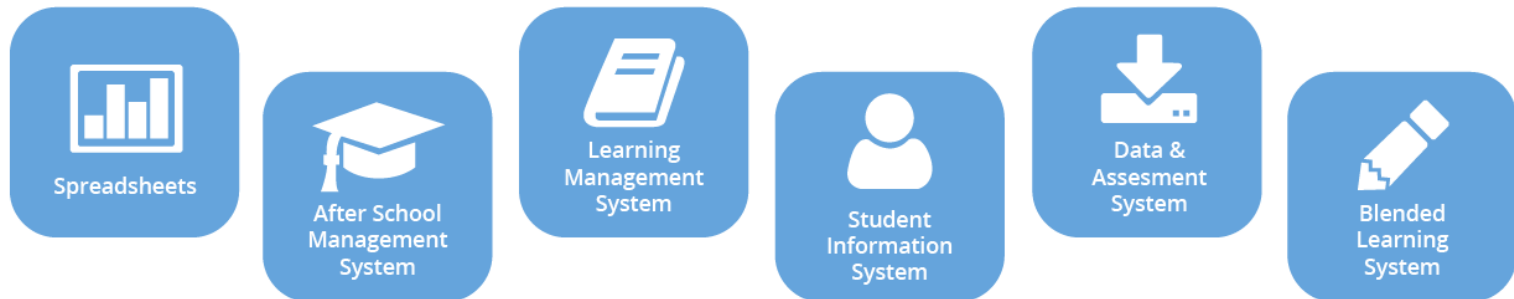

1. Access
To global real-time data

2. Tools
To make sense of data

3. A Platform
To align conversations and actions

Spreadsheets

After School Management System

Learning Management System

Student Information System

Data & Assesment System

Blended Learning System

Bottom Line: The state of data in education today is Data Rich, Information Poor.

The Solution

We deliver a *SaaS platform*
that helps Superintendents and
Leaders in education:

1. Access

multiple data sources
in one platform;

2. Align

actions via social
platform;

3. Transform

the way they manage school
districts recommendation engine.

Illustrations

3 illustrations for how iResult is reinventing ways
to make leaders in education more productive

1. A new daily habit: Intelligent Dashboard

- Today:
    - Information lives in **silos**
    - Education leaders **miss relevant data**
    - **Waste time**
- With iResult:
    - **One** goal-based impact intelligence dashboard to stay connected
        - Key Performance Indicators (KPIs)
        - Set goals
        - Action items due

Results:

- Responsive vs. reactive
- Meet goals
- Manage by results – continuous improvement

2. A way to measure program efficacy

- Today:
  - **No one source of truth** for measuring results of an intervention.
- With iResult:
  - Every education leader has a way to **measure results of their interventions**.

Results:

- Measure return on investment (ROI)
- Save money
- Meet goals
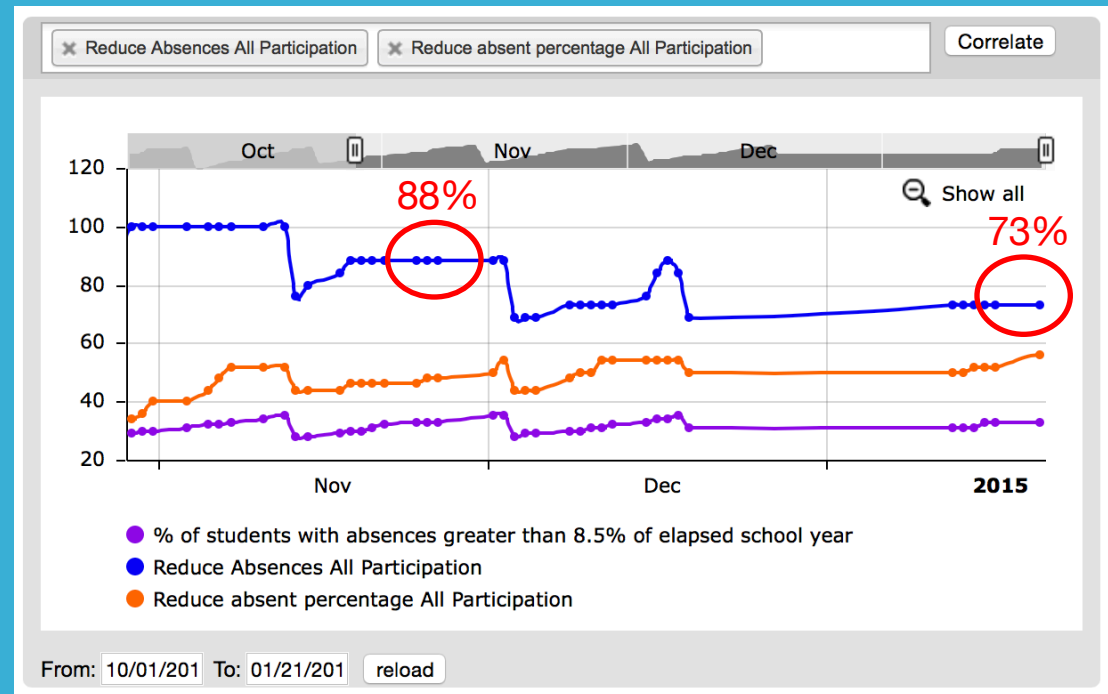

3. A way to drive data conversations

- Today:
  - No one platform to have continuous data driven conversations.

- With iResult:
  - Every education leader has a way to **align conversations with their data, their goal and their actions**.

Results:

- Save time
- Collaborate in real-time
- Get organized

Thank you!
