Brief History of Company:

SYNNEX Corporation was formed in 1980 and is now a Fortune 158 company that offers a comprehensive range of industry-leading IT products and business services to our reseller customers. We've built a solid reputation for delivering customized, fully-integrated solutions, services, and support, including distribution, contract assembly, business process outsourcing, and logistics.

We're aligned with the top manufacturers in the IT industry to distribute products to more than 25,000 resellers throughout North America. Key suppliers include: HP Inc., Hewlett-Packard Enterprise, Cisco Systems, Juniper, Palo Alto, Samsung, Panasonic, Intel, Seagate, Microsoft, and Lenovo. Our sales staff is grouped by product segment, allowing them to focus their expertise and experience to manage all lines and provide an engaged, consultative sales approach. With 16 US distribution facilities, SYNnex gets the right products to market quickly and cost-effectively. Our model streamlines business processes to help resellers lower their costs and create greater efficiencies. We provide a variety of professional and marketing services, including: demand generation, education and training, pre- and post-sale technical support, end-user enablement, server assessment, design and integration, recycling and trade-in, and IT resource planning. SYNnex provides contract assembly services, ranging from original design and printed circuit board assembly to fully-integrated supply chain management, build-to-order (BTO) and configure-to-order (CTO), final assembly, materials management, production value-add, and logistics.

SYNNEX sponsors a wide variety of programs, communities, and events to build and grow our resellers' business in specific vertical markets. For example, our Government, Education, and Healthcare programs help resellers compete in these high-growth markets, and SYNnex with our comprehensive GSA schedule, is able to simplify the complex government bidding process.

Our Services

SYNNEX offers a variety of services to our customers. The three major categories of services include the following:

Distribution Services. SYNnex 's distribution services segment distributes a broad line of IT products, including IT systems, peripherals, system components, software and networking equipment for leading IT OEM suppliers, enabling us to offer comprehensive solutions to our reseller and retail customers. Our reseller customers include value-added resellers, or VARs, corporate resellers, government resellers, system integrators, direct marketers and retailers. We distribute more than 2,000,000 technology products from leading IT OEM partners to more than 25,000 resellers throughout the United States, Canada and Mexico. We combine our core strength in distribution with our service model to provide our customers greater efficiencies in time to market, cost minimization, real time linkages in the supply chain and aftermarket product support.

Contract Assembly Services. SYNnex offers contract assembly services to original equipment manufacturers (OEMs). Offerings range from original design and printed circuit board assembly

capabilities to fully-integrated supply chain management, build-to-order (BTO) and configure-to-order (CTO), final assembly, materials management, production value-add and logistics services.

Business Process Outsourcing. The BPO segment offers various services comprising customer management, software development, web hosting, hosted software, domain name registration, and back office processing. This segment delivers its services through voice, chat, Web, email, and digital print. It also sells products complementary to these service offerings in China. In addition, SYNEX Corporation offers various financial services, including net terms, third party leasing and floor plan financing, letters of credit, and arrangements to collect payments directly from the end-user; online services; and marketing services, as well as technical support services consisting of pre and post-sales support. The company serves resellers, retailers, and OEMs located worldwide.

The above major categories of services are complemented by the following:

Logistics Services. SYNEX provides logistics support such as outsourced fulfillment, virtual distribution, and direct ship to end-users to our reseller customers. Other logistics support activities we provide include generation of customized shipping documents, multi-level serial number tracking for customized, configured products, and online order and shipment tracking.

Online Services. SYNEX maintains electronic data interchange (EDI) and web-based communication links with many of our reseller customers. These links improve the speed and efficiency of our transactions with our resellers by enabling them to search for products, check inventory availability and prices, configure systems, place and track orders, receive invoices, review account status, and process returns. We also have web-based application software that allows our resellers or their end-user customers to order software and take delivery online.

Financing Services. SYNEX offers our resellers a wide range of financing options, including net terms, third party leasing, floor plan financing, letters of credit, backed financing, and arrangements where we collect payments directly from the end-user.

Technical Solutions Services. The SYNEX team is made up of highly trained and certified engineers who assist our customers and sales reps with pre sales consultation, post sales troubleshooting, and training inquiries.

Joint Supply Chain Management and Distribution Services. SYNEX provides our contract assembly customers with materials procurement and management activities including planning, purchasing, expediting, and warehousing system components and materials used in the assembly process. Because we distribute many of the system components used in our contract assembly our customers are able to minimize their inventory risk by taking advantage of the terms and conditions of our distribution relationships. In addition, we also offer increased inventory availability to our contract assembly customers because we stock items for both distribution and assembly.

Our Operations

SYNEX operates distribution facilities in the United States, Japan, England, Canada, Latin America and Mexico. Our distribution processes are highly automated to reduce errors, ensure timely order fulfillment, and enhance the efficiency of our warehouse operations and back office administration. Our distribution facilities are geographically located near reseller customers and their end-users. This

decentralized, regional strategy enables us to benefit from lower shipping costs and shorter delivery lead times to our customers. Furthermore, we track several performance measurements to continuously improve the efficiency and accuracy of our distribution operations.

Our regional locations also enable us to make local deliveries and provide will-call fulfillment to more customers than if our distribution operations were more centralized, resulting in better service to our customers. Our workforce is comprised of permanent and temporary employees, enabling us to respond to short-term changes in order activity.

SYNNEX's proprietary IT systems and processes enable us to automate many of our distribution operations. For example:

- SYNNEX uses radio frequency and bar code scanning technologies in all of our warehouse operations to maintain real-time inventory records
- We facilitate frequent cycle counts and improve the accuracy of order fulfillment
- SYNNEX uses palm readers to capture real-time labor cost data, enabling efficient management of our daily labor costs.

To increase the accuracy of our order fulfillment and protect our inventory from shrinkage, our systems also incorporate numerous controls. These controls include order weight checks, bar code scanning, and serial number profile verification to verify that the product shipped matches the customer order. We also use digital video imaging to record our small package shipping activities by order. These images and other warehouse and shipping data are available online to our customer service representatives, enabling us to quickly respond to order inquiries by our customers.

SYNNEX operates its principal contract assembly facilities in the United States and the United Kingdom. We assemble IT systems that include workstations, servers and high end storage array solutions by incorporating system components from our distribution inventory and other sources. Additionally, we perform production value-added services, including kitting, asset tagging, hard drive imaging and reconfiguration. Our contract assembly facilities are ISO 9001:2000 and ISO 14001 certified.

Describe How your Company will Market this Contract if Awarded.

SYNNEX has a significant amount of experience owning/managing Public Sector contracts. These vehicles do not sell themselves and require a significant amount of investment in sales and demand generation to make them successful. Our plan will include a number of facets addressing both resellers and endusers. Although we don't sell direct to endusers, we do have a team that provides enduser demand generation through call out campaigns; print/mailers; e-mail; website contract landing page and an electronic storefront offering. For our resellers, we will pull our historical procurement data per awarded vendor line to identify the most responsive/responsible resellers selling into State and Local Government, K-12 and higher education nationwide. To date, we have identified 50 resellers and will use this list to identify those resellers we want to authorize on the contract. Likewise we will do this nationwide and include higher education institutions and state/local government sales as well. In this way we can ensure we have the

correct "feet on the street" in all areas covered by NCPA. With this select group of resellers, we will implement regular trainings to ensure they understand the NCPA contract and the target audience. Ongoing efforts will be to establish a regular sales meeting cadence in which we review sales efforts, pending opportunities and any issues. Manufacturers and their local sales teams will likewise be engaged to assist in the identification of opportunities and special pricing. We will provide support for table top shows, collateral and web landing pages for our participating resellers. Ultimately, we see our role as an IT distributor to provide all of the tools a reseller will need to increase their sales on this contract and to help develop the partnership with the vendor and their field sales teams. SYNEX will also make available our extensive technical support team and 24/7 customer service call center to ensure exceptional customer support.

Marketing this contract will include a number of simultaneous activities:

- Press release
- Identifying the resellers we want to authorize to promote this contract
- Reseller recruitment and training
- Multiple training webinars for both internal sales teams and external customers
- Dedicated NCPA web page development
- Development of marketing materials
- Attending industry events and table, top shows
- Ongoing reseller recruitment efforts and internal sales trainings
- Enduser demand generation team will drive awareness with endusers on behalf of our resellers
