No members of Swim Paso were ever contacted by the grand jury regarding our participation in the past process or for information regarding the aquatic project or support of it.

> We anticipate providing our document to the school board prior to Saturday 1/9/21.

I am writing to you in advance, as the only two remaining board members who have been seated for the long haul, to ask that you will support us in assisting the public and newer board members in having the full and correct facts/information with which to make practical and fair decisions in the future. The aquatic complex doesn't have to be built during this economic crisis but the amount of bond funds committed should be reserved for a future build which we believe is possible with current products in storage, careful planning, research and commitment to being fiscally prudent and prioritizing the needs of the students and restoring faith/trust of the district.

> We thank you in advance for keeping an open mind regarding options in this difficult situation.
