School Climate Survey Results (Fall 2020)

How connected do you feel to your school:

- Elementary-- 51% (average of two related questions)
- Middle School--31%

Overall, how much do you feel like you belong at your school:

- Elementary--83%
- Middle School--66%

How sure are you that you can do well in school right now:

- Elementary-- 83%
- Middle School--74%

Spring Follow-Up

Our counseling team sent weekly student check-ins this year. As we monitored responses, each week our questions changed to gather deeper insights and support trends that students shared. This spring, as school's reopened, we did follow-up questions with students to monitor their connection to school. This particular check-in was targeted to K-2, 3-5, and grade 6 students--both roomers and zoomers--after our campuses re-opened on February 1.

In April, 2021, 7th and 8th grade students were emailed directly to garner updates about their overall mental health. The questions were targeted to current student needs and not directly comparable.

February 2021

How much does your school make you feel connected and valued?

K-2: 71.4%

3-5: 86.7%

6: 61.3%

Next Steps For Continued Monitoring

In the 2021-2022 school year, our Wellness team will:

1. Repeat the Panorama survey questions in September 2021
2. Continue with monthly student check in messages targeted with our own staff and student experiences
3. Utilize email for middle school students to access/reply to target questions related to climate and overall wellness
4. Connect a check in closure activity with push in lessons or targeted video virtual lessons.

Questions/Comments
