

Timestamp	I have reviewed the Bond Update posted to the 9.23.21 agenda.	I would like more information regarding this aspect of the item:	I would like clarification regarding this aspect of the item:	I would like share the following perspective regarding the item:
9/17/2021 17:27:48	No	There is not bond update posted on the website.	The agenda is very sparse compared to prior agendas.	Please remove the special education settlements from the consent agenda item. The public needs to see how much money is being spent on settling lawsuits. And that item has typically been in the agenda with the amount posted.
9/19/2021 8:40:36	No	The agenda lists the bond update, but there is no report attached. Additionally, I thought that the public input was intended to be for the facilities plan update.	There are no details or attachments for any parts of the agenda.	I find this exercise useless if there is no meaningful information shared.
9/21/2021 8:05:37	Yes			5.2. Construction Delivery Methods and Agreements
9/21/2021 8:26:13	Yes			5.2. Construction Delivery Methods and Agreements, My name is John Medina I live 2 blocks from George Hall Elementary where both my children attend. I installed Fire Sprinklers for a living with Local 483 where I now represent my fellow brothers and sisters who do the same. Life safety, and construction in general should be installed by state licensed and the highest trained individuals who come from legitimate apprenticeship programs. The district is responsible for spending the tax payers dollars in the most appropriate manor this should include supporting apprenticeships and pathways for local residents to good paying careers such as mine. This can only be insured by a labor agreement to make sure whoever is bidding on local school projects is qualified to do so and gives the district opportunity to support local hire, apprenticeship, pathways for veteran's and the underserved population. I ask for you to support a Labor agreement to insure our neighborhood schools are being built and maintained properly. Thank you
9/22/2021 18:44:19	Yes		4.2.5 - zoom license - why would we pay \$9000 for a 3,000 person webinar when we are moving to Youtube for large group communication?	
9/22/2021 18:50:48	Yes			4.2.7 - I would like to see a summary of the warrants in a manner that makes it easier for the community to understand. Some of the warrants specify an area of LCAP, that is helpful for people to know - I'd like to see more of that. Thank you.
9/22/2021 18:55:10	Yes	7.3 I would like to know more about the board community workshops. This meeting offered less information than the previous meeting. What is the budget impact, how many are being planned, and how will community input be gathered to determine the calendar?	Will each community workshop be offered to the whole district, or will they be specific to a school? Will Cafe con Diego continue, or will they stop in favor of the board & community workshops?	
9/22/2021 18:59:44	Yes		7.2 - when the decision is made to hold recess and lunch indoors, what Covid risk mitigation factors will be implemented and will the schedule change at all?	Can we consider (at least in elementary schools) implementing a 'rainy/AQI day' recess/lunch schedule that minimizes the number of people in a space eating together?
