

## PURCHASE PROPOSAL

Please see 3Degrees' proposal for a purchase below, which mirrors the terms of our existing purchase with MUSD.

Transaction 1 is a purchase that 3Degrees can make today without any contingencies. The second is contingent on our successful renewal with Silicon Valley Power. The term of our purchase would also be dependent on the term SVP selects for the next iteration of the program, either 3 or 5 years. Note that a 5 year contract is the best outcome for Milpitas due to the age of the facilities and the potential for CRS to shorten the rolling online date window.
