Search data from California School Dashboard

On March 15, 2017, the California Department of Education published a field test version of the California School Dashboard for schools and districts. The dashboard shows progress, or lack of it, on multiple measures. This database shows indicators of progress on five measures, in color codes selected by the state. Other indicators will be added later as the state develops them, or collects the data needed to populate this database. EdSource has compiled the key indicators in an easy-access database for each school or district in the state. Enter a search term in the box below to search by school, city, district or county. If a school or district does not appear, it means that no data is available. Blank spaces can mean several things. For an explanation, see the notes below the chart.
