Scope of Services: Mindset Works® SchoolKit

The Mindset Works **SchoolKit™** is a comprehensive intervention that includes **Brainology®**, **Applied Brainology®** (student programs), and the **MindsetMaker™** online professional development program for one school for one academic year.

Brainology, the student curriculum, is targeted toward students in grades 4 -9. Brainology's blended learning curriculum includes online, animated instructional units as well as offline classroom activities designed to reinforce the program's content. Educators access the Brainology Implementation Guides, which are intended to support implementation leaders in cultivating and reinforcing the growth mindset in their students as they work through the program's online units. The Implementation Guides help strengthen implementation fidelity with sample implementation timelines, and provide educators with differentiated lesson options in order to reach students with various learning needs. Educators are also provided with online tools to track student progress and access student data (such as journal reflections).

Applied Brainology is a blended learning program for 7-12th grade students that reinforces and deepens growth mindset lessons learned in Brainology or as a stand alone program for older students. The program includes online videos and offline activities and resources to deepen growth mindset practice and learning.

The Mindset Works MindsetMaker is an online professional development program designed to help educators, including teachers and administrators, learn about the growth mindset and how to incorporate it into their everyday practice to support students and colleagues in developing a growth mindset. The MindsetMaker professional development course for educators, is an online multimedia resource that provides educators with the foundational knowledge, strategies, and tools to support a growth mindset in their students and classrooms.

Please note that all components of the SchoolKit (Brainology, Applied Brainology and MindsetMaker) may be accessed by faculty online and administered to students by faculty members.
