Rationale for activity:

A) Explain the educational value and relate to the instructional program or sponsoring organization and Policy 110).

Students learn earth science, social studies and leadership through direct experience and observation. The outdoor school curriculum at Pali Institute includes ecology, animal adaptations, food webs, topographic maps, renewable and non-renewable resources, geology, fresh water biology, archeology and government.

B) Explain impact on instructional time and justification for any time lost.

Pali Institute has a very positive impact on our science program. Many of the California State Science Standards are taught. We refer to things covered at Pali Institute throughout the year. We would have to shorten our math class throughout the year to cover the science that is taught at Pali, about 24 hours of science.
