THE FORMETCO FSI DIFFERENCE

L SERIES

Formetco's FSI L Series comes in both 4.8mm and 3.9mm standard pixel pitches. The FSI product line allows for serviceability from the front or the back. The LED tiles are attached magnetically providing for quick and easy removal.

M SERIES

Formetco's FSI M Series is our highest resolution product line that has pixel pitches that range from 2.9mm and go down to 1.6mm. The M Series building block is designed to have a 16:9 aspect ratio, so we can offer LED screens that have a true 16:9 aspect ratio.

Excluded Items
