TO: Board of Education

FROM: Randall Booker, Superintendent

Song Chin-Bendib, Assistant Superintendent, Business Services

SUBJECT: APPROVE 2016-2017 AND 2017-2018 INSTRUCTIONAL CALENDARS

I. <u>SUPPORT INFORMATION</u>

The Instructional Calendar is a negotiated "working condition" as included in the collective bargaining process between the District and Association of Piedmont Teachers (APT). As part of the Interest Based Bargaining (IBB) process the calendar is negotiated separately from the annual openers each year. The current Collective Bargaining Agreement (CBA) is in force through June 30, 2016, but discussion of the 2016-17 Instructional Calendar began in the summer of 2015.

Recommended Calendar

As part of the calendar development process, APT membership and District representatives developed a variety of Instructional Calendar options: a parallel of this year's calendar, opening school in the second week of August, calendars with the end the first semester prior to winter break, opening school in the last week of August, and a calendar with the first day of school beginning in the third week of August. All of these options had differing vacation breaks as well.

During APT's election process, none of these options received more than 50% of the votes. A run-off election ensued with the recommended calendar approved and attached.

The recommended calendar highlights are as follows:

- School begins on during the 3rd week of August.
- Places the end of the first semester prior to the Winter Break.
- Incorporates a Flexible Professional Development Schedule.
- School is IN session on Monday and Tuesday of Thanksgiving Week.
- Schools are closed during the February President's Week.
- Last day of School is June 1st
- Summer is extended (from the typical 9 weeks) to 10 weeks.

The Board will be requested to approve the calendar as presented since the Board reviewed the options as part of the negotiations process with the assumption that the options were acceptable.

Background

Although subject to negotiations, the District and APT gives consideration to input from CSEA and parents. Parents and students (grades 6-12) were an opportunity to provide input on the 16-17 Instructional Calendar by participating in a separate student and parent survey.

Parent and Student Survey

Over the last five years, the District has conducted several surveys of parents and middle and high school students (in 2011, 2012, and 2015) concerning the school calendar. The survey results indicate strong support for ending the first semester before the Winter break because this is believed to be in the best interest of students. Nonetheless, there is split opinion about how to accomplish this change. The District is now exploring alternatives to its current calendar, for possible implementation starting in the 2016-17 school year, to make this change. For more information on the Instructional Calendar Development Process, please visit the <u>PUSD Instructional Calendar FAQ – October 2015</u>.

One of the District's goals is to support the social and emotional needs of students by reducing unnecessary student stress. One way to reduce unnecessary stress is to ensure that school vacations are in fact vacations from school.

Under the District's current instructional calendar, middle and high school students study and complete school work over the Winter break. The students take exams after the break and then almost immediately start the second semester. If, instead, exams and projects were completed before the break, students could spend their vacation time relaxing and recharging, and start the second semester rested and refreshed.

Surveys of District students and families show strong support for ending the first semester before the Winter break. In the most recent survey, completed on October 6, 2015, 78% of middle and high school students and 63% of District parents indicated that their "strongest preference for the timing of first semester finals" is before the break (448 students participated in this survey, along with 629 parents). Similarly, in the 2012 survey, 83% of middle and high school students and 62% of parents indicated that their "strongest preference for the timing of first semester finals" was before the break (the calendar survey administered in 2011 did not address the timing of first semester finals.).

This approach is strongly recommended by Challenge Success, the project of the Stanford University School of Education that consults with this and other school districts on student health issues, as a means to reduce unnecessary student stress. A survey of Piedmont High School Students conducted in 2014 confirms the importance of mitigating students stress to the extent possible. This survey revealed that 78% of the 710 participants reported they were often or always stressed by schoolwork, 63% of participants reported that schoolwork often or always kept them from having time with family or friends, and 69% of participants reported that schoolwork often or always kept them from getting enough sleep.

Finally, some educators favor ending the first semester prior to the December break to address a different concern -- the "loss of learning" that sometimes occurs over the break, followed by the need to reteach certain material after the break and before final exams.

For these reasons, the District explored alternatives to its current instructional calendar, for possible implementation starting in the 2016-17 school year, that provide for a true school vacation during the Winter break.

Although there is strong support for ending the first semester before the break, there is split opinion about how to accomplish this shift. In the 2015 calendar survey, 50% of students and 37% or parents expressed either strong agreement or agreement with starting school one week earlier, while 55% of students and 62% or parents expressed either strong agreement or agreement with having unequal semesters. Given this split, the District explored a variety of approaches to make this shift.

These approaches included, but were not limited to, beginning the school year during the second week of August, eliminating the November Monday/Tuesday break prior to Thanksgiving, and/or developing flexible staff development opportunities for teachers and staff as a means to capture additional student days during the 1st semester.

Calendar Requirements

The Instructional Calendar includes setting the first and last day of school for students, non-school days for students that are either vacation or designated professional development days for staff. The setting of the semester length, report card grading periods, minimum days, conference days, and testing schedules are not subject to negotiations and are set after the Instructional Calendar is voted and approved by the APT membership and the Board of Education.

The Instructional Calendar has strict requirements from the State that must be addressed:

- 180 school attendance days a day must be at least 325 minutes to count as a day. Funding from the State is calculated based on the attendance rate of students on the designated 180 student days in the calendar.
- Each grade level must also offer a specified total minimum number of minutes in the 180 days.
- Each grade level at each school must offer the equal amount of total minutes in the school/District (e.g., all third grades in each of the three elementary schools must offer same total minutes per year).
- Prescribed holidays included as part of the calendar with some flexibility when scheduled, except November 11, which is an "immovable holiday" and must be a non-school day if falls between Monday and Friday.
- Per local agreement, the APT base work year of 185 days that includes 180 student days, 3 professional development days and 2 work days.
- The start and end of the school year varies in districts throughout the State. Recent discussions have included the possibility of setting a

calendar that allows for the semester to end prior to the traditional winter break at the end of December that goes through the beginning of the New Year.

The start and end of the school year has a direct effect on the schedule of holiday/breaks through out the school year to meet State requirements and District agreements. In addition to the State and local requirements, the Instructional Calendar is designed to support students by considering the following factors that affect all:

- A schedule that supports optimal learning and long-term retention of academic material for students in grades pre-K though grade 12.
- Balance of student workload and high stakes stressors (e.g., testing and college applications).
- Balance of work/school/family time for students, parents, and staff.
- Decision timeline that allows for planning for staff and families.
- Professional development schedule that supports teaching and learning.

II. RECOMMENDATION: REVIEW

Review the 2016-17 and 2017-18 Instructional Calendars and approve as presented.
