

To whom it may concern,

Upon discharge from USMC in 1965 I became a construction carpenter until 1993 when I began training for ICBO deputy inspection, certifying in all five Deputy Inspection classifications as well as CWI through the American Welding Society. In 1997, I achieved DSA Project Inspector certification.

My objective in project inspection is to assure the client gets everything allowable within the contract documents. I achieve this through working relations and open communications with the Architect, Contractor and of course the Client. I work within the authority's guidelines with a proactive approach which helps the contractor to provide the required product with fewer time consuming 'do-overs'. This approach has historically helped projects to complete within budget and on time.

**My Project credits include:**

- |              |   |
|--------------|---|
| 1996/1997    | Elsinore Unified School District, Lake Elsinore, CA:<br>New construction, Temescal Canyon High School Phase II,<br>(as the DSA Masonry Inspector and Assistant Project Inspector, 1996/1997).   |
