DESCRIPTION	AMOUNT
Transportation Yard - Concrete Pad DEMO/REP: This work involves sawcutting, jackhammering and hauling away approximately 2400 sq. ft. of existing asphalt. We will sawcut in areas that are necessary, to allow for a clean removal of the asphalt. We will excavate to a depth of at least 6 inches. We will recompact the subgrade, and install baserock in areas that are necessary, to give a sturdy foundation for the new concrete being installed. We will be using lumber to form the new concrete being installed. We will set in #4 rebar every 18" O.C. to help reinforce the concrete. INSTALL: We are going to be installing 2400 sq. ft. of new concrete. The concrete will be a 6 sack 3/4" rock with one pint of lamp black per yard. It will be 3000 psi, a standard broom finish and 6 inches thick. Entire site will be swept and cleaned upon completion and any excess debris will be disposed of. DIR #: 1000024982	69,950.00

BRAD BARNCORD 558-2471 bbarncord@smuhsd.org

PROPOSAL · CONTRACT · WORK ORDER

We hereby agree to furnish all labor, materials and equipment for the completion, in a good workmanlike manner, of the following described work:

Job Location: PHS 300 PIEDMONT AVENUE SAN BRUNO, CA

REMOVE AND REPLACE A 390 FOOT SECTION OF ACCESS ROAD IN FRONT PLUS SMALL WING PORTIONS OF THE ADJOINING ROADS:

SAW CUT AT THE LIMITS OF THE PAVING AND GRIND DOWN THE EXISTING ASPHALT FROM THIS 13,220 SQUARE FOOT AREA. HAUL THE SPOILS OFF SITE. RECOMPACT THE EXISTING BASE, OIL THE VERTICAL EDGES OF THE EXISTING ROAD THAT WE ARE TYING INTO, AND PAVE WITH 4 INCHES OF HOT ASPHALT, ROLLED AND COMPACTED IN TWO LIFTS.....\$67,000.00

NOTE: TO DO THIS WITH THREE INCHES WOULD COST..... \$ 60,000.00 THE SAVINGS WAS LESS THAN I THOUGHT BECAUSE THERE WOULD BE EXTRA WORK BRINGING AND GRADING AND COMPACTING BASEROCK TO MAKE UP THE 1 INCH DIFFERENCE, SO THE GRINDER COST AND TRUCKING WOULD BE THE SAME. WE WOULD ACTUALLY NEED MORE LABOR BECAUSE OF THE WORK GETTING THE BASEROCK DOWN AND THEN PAVING . THE ONLY SAVINGS WOULD BE LESS ASPHALT.

Work Not Included:

Our price for the above is:AS SHOWN ABOVE

Mr. Brad Barncord, FMP, SFP
General Manager of Maintenance
San Mateo Union High School District

Job Reference: District Transportation Yard

FACSIMILE:

Dear Brad,

510.232.3205
TELEPHONE:
510.233.2795

It was a pleasure meeting and talking with you regarding the installation of an automatic gate system at your campus shown above. Electronic Innovations is pleased to have the opportunity to submit our proposal for your consideration. We have been in business since 1980, and have designed, installed and serviced thousands of automatic gate and entry control systems.

We propose to install gate automation for an existing chain link single slide gate, with employee and driver entry controls. This project will be quoted using "prevailing" wages.

The existing gate will be reused for this project. We will install new covered V-Groove wheels for the front of the gate and new covered pipe rail wheels for the back of the gate. A stay roller assembly will be installed.

The gate will be automated with a LiftMaster CSL24UL slide gate operator with built in battery back-up. The operator will be installed on a new concrete pad.

Power for the system will be obtained from the panel on the shed on the north side of the property and routed to the gate operator location using both underground conduit, from the shed to the fence, and surface mounted conduit, along the perimeter fence. The underground conduit will be 1" PVC and the surface mounted conduit will be 1" RSC. The wire for power will be 10ga. The distance for the power run is approximately 400'.

Employees and drivers will enter and exit the property via a wireless keypad located on a steel "gooseneck" pedestal approximately 7 feet in front of the gate.

After any vehicle enters or exits, the gate will automatically close. There will be two (2) loops sawcut into the pavement, one (1) inside and one (1) outside the gate, which will prevent the gate from automatically closing on a vehicle. Vehicles will open the gate to exit by driving over the inside loop.

A Knox fire department key switch will be installed on the outside of the post. An infrared photo beam will be installed to span the gate opening. Gate "sensing" edges will be installed on the front and back leading edges of the gate.

Our scope will include the following equipment.

<u>Qty</u>	<u>Mfr</u>	<u>Model</u>	<u>Description</u>
4	E.I.		New covered wheels for the front and back of the gate
1	E.I.		Stay roller assembly
1	LiftMaster	CSL24UL	Low voltage slide gate operator with battery back-up
1	E.I.		Concrete operator mounting pad
1	LiftMaster	WKP250	Wireless digital keypad
1	E.I.		Steel gooseneck pedestal flange mounted
2	E.I.		Vehicle detection loops. The inside loop is also an auto-exit loop
2	LiftMaster	L505AL	5' Gate sensing edge with receiver and transmitters
1	LiftMaster	LMRRU	Infrared photo beam spanning the gate opening
1	Knox	3502	Fire department emergency access key switch
Lot	E.I.		Trenching, conduit and cable for power run

Our price to furnish and install the above equipment is **\$26,490.00**, including sales tax.

Work/Equipment by Others

1. Building permits, if applicable. We will furnish a dimensioned layout drawing to assist you in the permit process. We can obtain the permits for you on a T & M basis.

Note: If Work by Others is not completed per the installation schedule as agreed to by the buyer and Electronic Innovations, the buyer will be subject to an "additional trip" charge if a second visit to site is required for us to complete the originally scheduled work.

Terms: 25% deposit, progressive billing during installation, with balance due upon completion. We reserve the right to withdraw this quote after 60 days if not accepted.

Electronic Innovations will warranty the new parts and labor for one year, excluding misuse, neglect, vandalism and acts of God.

Our standard insurance will apply unless customer has specified insurance requirements prior to this proposal.

Thank you, Brad, for the opportunity to submit our proposal. If you would like to discuss this quote, please call me at 510-233-2795 ext. 17. If you wish to proceed with the project, please authorize below and return by fax. We can mail our contract to you, or we would be happy to perform the work under your P.O. or contract with the above terms. We look forward to being of service to you.

Authorization to Proceed:

Best regards,

Authorized Signature

Replace floor in Dance Room with Robbins Le Lena A Performing Arts Flooring System

Description	AMOUNT
Remove existing maple and dispose off site	\$ 5,687.00
Correct 'dip' in front of door	
Inspect concrete slab for excess moisture and flatness.	
Any repairs, if needed, are not part of this quote	
Provide and install 25/32" x 1 1/2" EZ XL Robbins 2nd Grade Maple	
Sand, one coat waterbase seal and four coats satin waterbase finish (5 coats total)	\$ 59,714.00
New black rubber base	
Re-use door thresholds	
Work is scheduled for June 10, 2019	
<u>Excluded:</u>	
Correcting concrete subfloor for defects, excess moisture or flatness	
FSC wood	
Working overtime or weekends/holidays	
TOTAL	\$ 65,401.00

HY Floors is signatory to the Northern California Carpenter's Union and is an MFMA Mill-Accredited Installer. GC needs to provide a concrete slab moisture level no higher than 85% RH and slab flatness of 1/8" in 10'. Jobsite needs to have HVAC operational and all painting and overhead work complete before we bring wood flooring on site. We reserve the right to alter any contract clauses upon inspection, and we will strike any clause pertaining to offsetting payments between different projects. Unless otherwise stated above, the warranty for this project is 1 year from substantial completion date.

We appreciate your business!
